Introducing Open Badges:
a new online standard to recognize and verify learning

- Free and open**
Mozilla Open Badges is not proprietary. It's free software and an open technical standard any organization can use to create, issue and verify digital badges.
- Take your badges everywhere**
Collect badges from multiple sources, online and off, into a single backpack. Then display your skills and achievements on social networking profiles, job sites, websites and more.
- Knit your skills together**
Whether they're issued by one organization or many, badges can build upon each other and be stacked to tell the full story of your skills and achievements.
- Full of information**
Open Badges are information-rich. Each badge has important data built in that links back to the issuer, criteria and verifying evidence.
